

Reuben Firmin

Technology leader, startup CTO.
High productivity software engineer and architect.
US citizen, authorized to work in the US.

Experience

VPE

Mediafly

Apr 2022 -
present

Mediafly acquired ExecVision in April 2022 for product capabilities.

- ★ Led engineering efforts to integrate rebranded ExecVision platform and technology into Mediafly products.
- ★ Ran technical diligence for successful strategic technology acquisition.
- ★ Managed three (remote) engineering teams from acquisitions.
 - Mentored new engineering managers
 - Led recruiting and onboarding for new developers
 - Merged and cross trained teams in different stacks
- ★ Served as de facto principal engineer, worked hands on in complex code as necessary.

Tech skills: Kotlin, Python, Postgresql, ElasticSearch, SQL, AWS, Linux, GPT, LLM, langchain, NLP, ML, React, Typescript, Javascript, Distributed Systems, Data Pipelines, Architecture, Agile Project Management.

CTO

ExecVision

Oct 2015 -
Apr 2022

Joined ExecVision months after founding; led technology & product through successful exit.

- ★ Hired and managed a fully remote team from 2015 onwards, nurtured strong culture, mentored and trained engineers & managers, designed and iterated on processes.
- ★ Designed and implemented compliance policies, obtained and maintained SOC2, managed client security reviews.
- ★ Participated in fundraising; regularly presented to the board and to VCs.
- ★ Managed product roadmap and specifications - hands on oversight of product design, built wireframes, ran iterative feedback cycles, worked directly with ui designers, and regularly sought customer feedback.
- ★ Coded significant parts of the codebase, performed profiling and performance optimization, led architecture, implemented distributed processing framework.
- ★ Performed code reviews, and set the tone and depth for peer review. Managed and trained QA team, and established quality/risk management process.
- ★ Selected and managed vendors. Managed and optimized budget.

Tech skills: Kotlin, Python, Postgresql, ElasticSearch, SQL, AWS, Linux, NLP, ML, Java, Python, React, Typescript, Javascript, Distributed Systems, Data Pipelines, UX Design, Architecture, Agile Project Management.

CTO / Founder

4rc.io

Sep 2013 -
Oct 2015

Virtual CTO consulting company, founded as CTO/CEO.

- ★ Designed and implemented business model whereby we'd engage with an early stage business client with an equity/cash contract, build product, technology and team to 1.0, and then backfill and move to the next client.
- ★ Three successful engagements, culminating in ExecVision in 2015, who I went full time with.
- ★ Handled all sales/marketing, and client support. Performed requirements analysis & iterative product development with clients.
- ★ Recruited and trained offshore technology/product teams. Owned product prototyping and architecture, and performed hands on coding.
- ★ Approaching \$2m revenue in 2015.

Tech skills: Java, Postgresql, Redshift, Python, SQL, AWS, Linux, Javascript, ETL, Architecture, Data Pipelines, Agile Project Management.

Education

Chief Architect
Catalist
Oct 2010 - Sep 2013

Technology lead at a political big data analytics firm.

- ★ Inherited and improved big data architecture.
- ★ Managed multiple engineering teams.
- ★ Significant hands on coding work.

Tech Skills: Java, SQL, Postgresql, Vertica, SQL, Linux, Javascript, Architecture, Data Pipelines, Agile Project Management.

Skills

BSc (Hons)
University of Aberdeen, Scotland

Computer Science with AI & Psychology.

- ★ Summa cum laude.

Technology Leadership

- ★ Team management, recruiting, mentoring, team optimization
- ★ Agile project management, kanban + sprint
- ★ Architecture and strategy
- ★ High performance, high quality, hands on coder
- ★ Effective bridge between executive and engineering organizations

Programming Skills

- ★ Kotlin - 6 years for backend webapps, 2 years for web frontend
- ★ Java - 15+ years
- ★ SQL - 20+ years
- ★ Python - 4 years
- ★ Javascript/Typescript, HTML, CSS - 15+ years
- ★ C, C++, Perl - 1 year

Frameworks & Libraries

- ★ Dropwizard (Jersey, Jdbi) - 10 years
- ★ Spring - 10 years
- ★ Guice, Guava - 10 years
- ★ React - 1 year

Databases & Search

- ★ Postgresql - 15+ years
- ★ Sqlite, MySQL, Oracle, SQL Server - 2 years
- ★ Redshift - 5 years
- ★ Vertica - 3 years
- ★ ElasticSearch - 8 years

DevOps

- ★ Linux - 20+ years
- ★ AWS (RDS, EC2, S3, ELB, ASG, IAM, Redshift) - 10+ years

Patents

Ergonomic Keyboard

- ★ US US20170185163A1 - Issued Jul 17, 2018
- ★ Hardware invention, sole designer and patent writer

Systems and methods for generating multi-segment longitudinal database queries

- ★ US WO2016154387A1 - Published Sept 29, 2016
- ★ Client sponsored patent, co-wrote with Cooley specialists

Endorsements

"Reuben's team punched way above their weight class especially given the limited resources we provided them. They cranked out more functionality in our product than teams 3x their size. It was a small but mighty group - exactly what our business needed." - Steve Richard, CRO, ExecVision

"Reuben is an architect and a hands on CTO. He is willing and able to speak with customers and prospects to understand their needs and translate that back into a complete product vision. He can also jump on a call anytime as a technical resource and outperform most salespeople. He has a natural ability to guide and motivate his team which was especially critical with the speed of development we needed to compete in our SaaS category." - David Stillman, CEO, ExecVision

"He's a smart, thoughtful, level-headed tech leader with a rare combination of strong technical chops, solid project management skills, good instincts when sourcing talent and an ability to translate the most sophisticated technology to meet customer needs and business objectives." - Mitch Praver, CEO, Devexi, Client

"Detail oriented, with a positive attitude and an ability to productively work with a variety of team members, he makes any manager look great and any team a winner. He is effective, thorough and quick. He thinks issues through and brings you solutions not problems. I enthusiastically recommend his work." - Tom Des Jardins, Manager, StreamSage/Comcast

"[He] is a very mature and level-headed technical leader. He has great depth and breadth in software engineering and is good at communicating and mentoring. He is an incredibly fast study on the business requirements and issues." - Peter Connolly, Direct Report
